Subject: Harco-G&B

I spoke with G&B's att'y, Peter Hapke today. He asked if G&B could do work at Harco site to determine depth and characteristics of material to be excavated (or otherwise handled). He said G&B was thinking about light drilling with a mobile corere to bring up samples without facing wetlands hassles that a larger trenching operation would run into. I said I thought it would be best to discuss that after EPA's meeting with the state on Tues (which he knew about). Pl. let me know what you think about this proposal, and if talking with G&B on Wed makes sense. You and I should talk after your Tues meeting with the state. Thanks.
